

ABSTRACT**THERMO-ADHESIVE SCRIM**

5

- The invention relates to a textile scrim (5A) formed by a network of nonwoven crossed yarns, comprising at least one ply of warp yarns (1, 1') and at least one
10 ply of weft yarns (2), the warp yarns (1, 1') and weft yarns (2) being bonded together by a bonding agent (3), said textile scrim (5A) being coated on at least one of its faces (A) with a thermally reactive adhesive (3) in order to laminate the scrim (5A) onto an external
15 element, characterized in that the viscosity of said adhesive (3), measured at a temperature of 230°C according to the ASTM-D3236-88 standard, is less than or equal to 40 Pa.s.

20 - Textile scrims.
